Individual Assignment Walkthrough Assignment Q&A

Individual Assignment (40%)

Based on the recommendation provided in the video presentation in part 1b of the group assignment, **identify and discuss one possible challenge** that the business may face such as loss of revenue in the short term, incurring additional costs, disrupting customer service or experience in the short term during the implementation of these intelligent technologies.

Based on the challenges identified, student is required to write a consulting paper no greater than 1500 words. The report should entail the following:

- 1) Elaborate on the biggest challenge as identified in section 1b of your assignment, supported by case studies and or academic journals.
- 2) provide a solution on how you would suggest to address the challenges. The solution should be supported by a case study or academic journal.

NOTE: Include any academic journals or case studies to support how the recommendation are possible solutions that can address the challenges. Such as companies who adopted the same technologies and how they managed to overcome the challenges. Or Academic journals on possible recommendations on the challenges the business may face. Submit your work in word doc.

** There are no templates for individual assignment.

Format & Structure

- Intro (300 Words)
- Body (1000 words)
- Conclusion (200 words)
- Reference list (Not included in word count)

Format & Structure

- Intro
 - Briefly introduce your group topic, the proposed recommendations and the main challenge identified
- Body
 - Discuss the main challenge identified in depth.
 - Provide recommendation as to how to overcome this challenge in depth
 - **All discussion here to be supported by either a case study or academic literature
- Conclusion
 - Briefly conclude and summarize the report.

Example...

One of your group's provided solution was to launch an E-Commerce portal so that the business can now expand its selling capabilities online and reach out to a bigger target audience.

There are many challenges that businesses face when adopting e-commerce, including:

- **Competition:** Small businesses need to compete with other businesses for customers by offering competitive products, services, and prices.
- **Customer experience:** Shoppers expect a similar experience to a physical store, and the lack of physical interaction can make it difficult to assess product quality.
- **Cybersecurity:** E-commerce platforms are vulnerable to cyber-attacks, which can lead to data breaches and loss of customer trust.
- **Customer loyalty:** Building customer loyalty is important, and branding can play a

10 Challenges of E-commerce and How to Overcome Them

Biggest Challenge - Dealing with Return Products

NRF RESEARCH

Customer Returns in the Retail Industry 2021

National Retail Federation

Published Jan 25, 2022

In partnership with

NRF and Appriss Retail surveyed retailers to better understand the current returns landscape. This report includes a look at the overall impact of consumer returns, how the holiday season and digital landscape impacts returns, and benchmarking data on return fraud. Some key findings are below:

- Total returns account for over \$761 billion in lost sales for U.S. retailers
- For every \$1 billion sales, the average retailer incurs \$166 million in merchandise returns
- For every \$100 in returned merchandise accepted, retailers lose \$10.30 to return fraud.
- Receipted returns are a hidden risk from behaviors like shoplifting, collusion, wardrobing and more

Industry research, return fraud

Biggest Challenge- Dealing with Return Products

According to data from the National Retail Federation (2021), U.S. consumers returned an estimated total of \$761 billion in merchandise in 2021 alone.

Thanks in part to supply chain challenges and rising prices, processing the return of a \$50 product is now expected to cost ecommerce stores an average of \$33 (Axios 2021).

The cost of having a high return rate goes far beyond lost profits. In addition to losing out on a sale, processing a returned product also means that you have to pay return shipping costs as well as any labor costs associated with your returns process, like assisting customers with returns and restocking returned products.

Solution

While product returns pose a serious problem for small retailers, there are solutions to solve this. According to an article by Miller (2023), below are some solutions presented to help reduce returns:

1. Encourage product exchanges over product returns
2. Provide in-depth and accurate product descriptions
3. Display multiple high-quality product photos that offer context
4. Leverage reviews of your product that assist other customers (especially as it relates to size and colour)
5. Don't skimp on packaging that protects your customer's product
